

DSV2-080-2NOS

Normally-Open, Two-Way, Two-Position,
Spool-Type Solenoid Valve

SERIES 8

DESCRIPTION

A cartridge valve designed to operate as a bi-directional blocking valve.

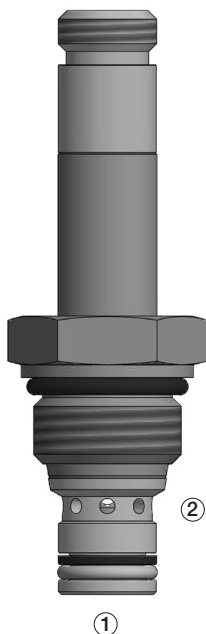

OPERATION

When de-energized, the DSV2-080-2NOS allows flow in both directions.

When energized, the cartridge's spool shifts to block flow in either direction.

Operation of Manual Override Option: To override, push button in, twist counterclockwise and release. In this position, valve will remain closed in a detented condition.

To return to normal operation, push button in, twist clockwise and release. Override will be detented in this position.

FEATURES and BENEFITS

- Both ports may be fully pressurized.
- Continuous-duty solenoid.
- Hardened precision spool and sleeve for long life.
- Efficient wet-armature construction.
- Cartridges are voltage interchangeable.
- Optional coil voltages and terminations.
- Manual override option.
- Industry common cavity.
